Amirul Ikmal

Muhammad Amirul Ikmal Bin Mohd Ridzwan

Software engineer building LLM products. Technical Co-Founder of Certava.

Malaysia · Open to full-time and contract work, remote · amirulikmal.biz@gmail.com · amirulikmal.com

SUMMARY

Software engineer in Malaysia with 9 years of shipping production systems, now focused on AI and LLM products. I co-founded Certava, an AI tool that shows companies how close they are to ISO 9001, 14001 and 45001, backed by about RM100k from Cradle Fund. On my own I built KatalogKu, a WhatsApp ordering catalog used by 162 sellers with RM18k+ in sales, and Kirabaki, a Malay WhatsApp bot that turns texts, receipt photos and voice notes into bookkeeping. By day I work on backend services and AI automation for Vorto's real-time logistics platform. Before that I spent years on government and enterprise systems, from SKMM's online exams to a passport and visa system used at 7 Myanmar embassies.

SKILLS

AI and LLM products
Gemini and OpenAI clause mapping and gap reports (Certava); LLM parsing of Malay WhatsApp messages, receipt photos and voice notes into sales entries (Kirabaki)

Product engineering
TypeScript; Next.js and React; Node.js; Go; PHP and Laravel; C# and ASP.NET; Java; Mobile: React Native, Swift, Java (Android)

Platform and data
Cloudflare R2; Vercel; PostgreSQL; MySQL; SQL Server; MongoDB; Stripe; CI/CD

PRODUCTS

Certava: AI platform for ISO compliance · certava.ai ↗

Certava shows quality teams where they stand on ISO 9001, 14001 and 45001: which clauses, risks, controls and evidence are covered, weak or missing.
Secured about RM100k in Cradle Fund funding.

Kirabaki: Bookkeeping bot on WhatsApp, in Malay · kirabaki.my ↗

Small sellers record their sales and expenses by sending Kirabaki a WhatsApp message in Malay, like “masuk 120 kopi”. It saves the record and works out the day’s profit.
In a pilot with KatalogKu sellers.

KatalogKu: Free online catalog with WhatsApp ordering · katalogku.my ↗

Sellers put their products on one free link, like katalogku.my/kedai-anda. Customers pick items and send the order straight to the seller on WhatsApp.
Used by 162 Malaysian sellers with 1,500+ products; 726 orders and RM18k+ in sales so far (Nov 2026).

EXPERIENCE

Technical Co-Founder, Certava

2024 - Present

- Co-founded an ISO compliance and gap analysis platform. I handle the engineering. Secured about RM100k in Cradle Fund funding.
- Built Gemini and OpenAI workflows that map uploaded policies to ISO clauses, draft SOPs and risk register entries, and export PDF and DOCX reports. Stripe handles billing.

Software Engineer, Vorto (Full-time) — Jun 2024 - Present

- Made 2,100+ code contributions since 2024 on a real-time logistics SaaS platform.
- Designed backend microservices to make the system more resilient and keep data consistent.
- Work with other teams on continuous deployment.

Business Owner, Soskod Solution (Part-time) — Jan 2022 - Present

- Part-time consulting business. I build web and mobile apps for clients in Go, React and Node.js.

Senior Software Developer, C Speed Network Technology Sdn Bhd (Full-time) — Jan 2023 - May 2024

Programmer, Akal Aspirasi Sdn Bhd (Full-time) — Aug 2019 - Jan 2023

- Built Portal Kempen Tabung Pahlawan 2019, a campaign portal with online payment through MPAY and a CMS (ASP.NET, C#).
- Built the veteran information update portal (Portal Pengemaskinian Maklumat Veteran), with user and role-scoped access (ASP.NET, C#).
- Built Usahawan JHEV, an e-marketplace portal plus Android and iOS apps (PHP Laravel, Java, Swift).
- Led the team building MyCraftShoppe, an e-marketplace portal and mobile app (PHP Laravel, React Native).
- Worked on the VIBES 2.0 rebuild at JHEV, a web portal and mobile app (C#, ASP.NET).

Software Engineer, Dharihaz Technologies Sdn Bhd (Full-time) — Dec 2018 - Jul 2019

Analyst Programmer, EQ Soft Sdn. Bhd (Full-time) — Jun 2018 - Nov 2018

System Programmer, NRM Technology Sdn Bhd (Full-time) — May 2017 - May 2018

- Application and hardware maintenance with JHEV for the Veteran Integrated Benefits (VIBES) system.

EARLIER CLIENT WORK

Shipped with previous employers before Vorto.

SKMM (Java)
Online Radio Amateur Exam (ORAE); ORAE Morse Code Exam; Exam Centers module; SEMS enhancements; ORAE enhancements

Republic of the Union of Myanmar (PHP, C#)
Passport and Visa Issuance System (VIS and PIS)

Jabatan Hal Ehwal Veteran ATM (JHEV) (C#, ASP.NET, ASP.NET MVC, SQL Server 2008, PHP Laravel, Java, Swift)
VIBES 2.0; VIBES 1.0; VETIS 2.0; Veteran information update portal; Usahawan JHEV; Portal Kempen Tabung Pahlawan 2019

Perbadanan Kemajuan Kraftangan Malaysia (PHP Laravel, React Native)
MyCraftShoppe

Majlis Amanah Rakyat (MARA) (C#, PHP Moodle)
Total Campus Management Solution (TCMS)

Corporate travel (C#, ASP.NET)
BCD Refresh and Plover

EDUCATION & CERTIFICATIONS

Asia e University, Bachelor of Information & Communication Technology (Hons) in Software Engineering (Oct 2019 – Oct 2022, CGPA 3.65)

Universiti Teknologi MARA, Diploma in Computer Science (2014 – 2017)

Build Wireframes and Low-Fidelity Prototypes, Google, Dec 2021

Start the UX Design Process: Empathize, Define, and Ideate, Google, Dec 2021

Foundations of User Experience (UX) Design, Google, Nov 2021

Mastering React, Code With Mosh, Feb 2019
